

The diagram illustrates a system architecture for a Message Client Device (12) connected to a Radio tower (15). The Radio tower is connected to an Airnet (12), which is connected to a Proxy Server (14). The Proxy Server is connected to a Landnet (16), which is connected to an SMS Server (20). The Landnet is also connected to a Message Server (18), which contains an MTA Server (18.1), an IMAP Server (18.2), and a Message Store Server (18.3).
